Lukas **Hostynski**

CEO

Concise Software

DESCRIPTION We provide development and engineering services, specifically tailored to companies and entrepreneurs active in the dynamic consumer internet, mobile, social and digital markets. The core technologies we work with oscillate around mobile apps, mobile porting, e-commerce, web portals and community platforms, as well as games development and design. We also are true experts in 3rd party API integration including social networks APIs such as FB API or Twitter API. Read more about our services and skillset on our webpage.

CONNECTED CARS

Vehicle OEMs are under increasing pressure to bring customers' connected lives into the vehicle. The challenge lies in providing seamless functionality while maintaining product differentiation to sell more vehicles in a world where demand for smart phone integration is rapidly increasing.

Concise Software started to penetrate that direction and already gathered significant experience on integration with many car OEM's infotainment systems. Please ask us for relevant case studies.

COOPERATION OFFERED

1. Outsourcing co-operation
2. Technical co-operation

WEB DEVELOPMENT AND SERVER SOLUTIONS

The "Consumer Internet" represents a very broad application space. Concise is focused on the

development and delivery of community platforms, e-commerce platforms, and portal creation. Our engineering sweet spots include JavaScript, PHP, .NET technologies, as well as a range of third party frameworks (Symfony, Zend), off-the-shelf e-commerce frameworks (OpenCart, Magento) and our internally developed e-commerce products.

We base our server solutions on Amazon EC2 Cloud and our server team is nominated as Official Amazon AWS Partner.

COOPERATION OFFERED

1. Outsourcing co-operation
2. Technical co-operation

MOBILE APPLICATIONS DEVELOPMENT

The Apps economy and mobile services industry is growing at a faster pace presently than the Internet grew during the 90's. The rapid growth and domination of the Android and iOS platforms prompted us to create dedicated development teams for each of these respective platforms.

Further to these deep in-house platform specific skillsets, we also invested heavily in the development of agile multi-platform teams to seamlessly support the porting of applications and software across multiple platforms. Alternatively we develop award winning and top perfroming applications and games from scratch. Our dedicated team covers all the relevant mobile platforms, including iOS, Android OS, Windows Phone OS, BlackBerry OS, Symbian and others, specialized in porting products across various platform technologies with ease.
