Description

Spikenet Technology, a French high tech company specialized in artificial vision, develops and commercializes innovative high end image & video analytics solutions for a wide spectrum of business: ITS (smart vision sensors for Automotive, Traffic Analysis), Security (Airport, Police), Robotics, to name a few. All Spikenet solutions are built upon its groundbreaking visual pattern recognition technology inspired from biology using asynchronous spiking neuron network. Mimicking our brain, Spikenet technology is capable of learning, memorizing, and identify any visual pattern: faces, vehicles, objects, animals, etc. We deliver turnkey solutions as well as bricks of technology (API) for PCs and embedded environment. Our image recognition engine has been implemented in mobile phone for 3D facial recognition.
