- 03.03.2015 Tuesday (9.00h - 11.05h)
- 03.03.2015 Tuesday (11.05h - 13.10h)
- 03.03.2015 Tuesday (15.15h - 16.55h)

Description

Tecsidel is a company that develops and integrates advanced IT systems. We are 240 professionals, with 3 offices in Spain and 6 abroad. We provide: •Toll & ITS Systems that implement intercity and urban tolls (specifically free flow), integrating Intelligent Transportation Systems devices to increase the traffic efficiency on roads and accesses. •Logistics Systems to manage material's operations on warehouses, factories, distribution centers, fleets, etc. •IT Solutions for Governments, CSPs, and major ICT users, based on third or own products (like eAdmin or software to monitor / operate ICT infrastructure) and services to develop, test and maintain specific IT applications. In this three activities lines mobile technology plays a very important role. (www.tecsidel.com)

Company

Organization Size

101-250

Areas of Activities

HARDWARE

1. Encryption and security equipment
2. IP networking equipment
3. M2M
4. Middleware
5. Monitoring systems and equipment
6. Test and measurement equipment

SOFTWARE/INTERNET

1. Application development
2. Data analysis
3. Network operating software

SERVICES/OTHERS

1. Business support systems
2. Device management
3. Managed network services
4. Network Management
5. Operational support systems
6. Outsourcing
7. Systems integration

Offer

IT Solutions to monitor ICT Infrastructures and Services. OSS/BSS.

In the MWC Brokerage Event 2015 we offer our IT Solutions to Monitor and Support Operations of ICT Infrastructures and Services, including Field Services Management cases.

We perform turn key projects to provide - building it if necessary - this solutions, that we assemble or construct with own - LIMS, TRAMS, - , third-party - like Tivoli Netcool - or open source - like Zabbix- products, that are integrated each other and / or with other systems. If needed, we develop 'ad-hoc' software to implement required capabilities and extent or to enhance capabilities existing on this products.

On this solutions - provided by us or by others - we perform additional services like consulting, testing or activities related to support and maintenance.

Recently we have included in our Monitoring & OSS solutions Batch Data Analytics based on Big Data and Real Data Analytics based on Complex Event Process.

We have identified Smart Cities as an environment where this and other technologies joined that we know and we use on Monitoring & OSS and on other portfolio of Tecsidel could be applied

Keywords: Monitor OSS Network Management
