Description

The principal mission of the ACCIO Shanghai is to help Catalan companies introduce their products and services into the Chinese market through a personalized and high added-value service. We also advise Catalan companies interested in settling in China, be it through the incorporation and registration of their own company or through the purchase of a local company. In this case, the center takes care of all the procedures. Our Shanghai team is also entrusted with assisting and advising Chinese companies looking to invest in Catalonia. Our team provides accurate, up to date advice. It acts as an interface between Chinese businesses and the specialist investment project manager in Barcelona, whose job is to guide overseas companies through the entire process of starting up and running a business in Catalonia. Our Business Promotion Centre is committed to providing a quality, expert and personalised service to both Catalan businesses interested in setting up overseas as well as to multinationals interested in investing in Catalonia. Our business runs on direct contact and placing enterprise and its needs at the heart of our work. Our Business Promotion Centre offers companies a complete portfolio of aids to business and a proven track record of success to endorse our service.
