Sales and Deployment Partnership

The Billing Components™ software suite provides a open, flexible and modular solutions for the challenges of the mobile communications marketplace. The system is continuously improved and can be easily supplemented with

external products or on-site developments through the Open API layer, which allows a simple integration to an existing environment. The software components support mobile operators and fixed operators as well as internet services (IP) and others. Over a period of more than 20 years they have been implemented at several international customer sites, including members of the T-Mobile group and the Vodafone group. Flexible solutions, easy to be integrated, providing high performance, competitive prices and flexible business conditions make Munich-based Billing Components GmbH the right partner for a long-term oriented engagement.
