BlueID SDK - Secure mobile keys

http://www.BlueID.net

Bilateral Meetings

- 04.03.2015 Wednesday (11.05h - 13.10h)

Description

BlueID is a software security layer for embedded systems and smartphone apps. It allows apps to receive secure digital keys to control physical objects - even offline.

Our customers are hardware manufacturers of electronic door locks, cars or other vehicles, barriers and gates, banking terminals, postal boxes etc. They easily integrate our software platform to quickly introduce secure mobile keys to phsically access their products.

The BlueID SDK is available for:
• Android & iOS smartphone apps
• OSGi / Java / C based control units
BlueID is easy to install and can be licensed. More information can be found at www.BlueID.net.
