Bilateral Meetings

- 03.03.2015 Tuesday (15.15h - 16.55h)
- 04.03.2015 Wednesday (9.00h - 11.05h)
- 04.03.2015 Wednesday (11.05h - 13.10h)

Description

waylay is a PaaS automation platform for smart connected device solutions. It visually combines data from (IoT) devices, applications and online services and enables better real-time decisions via smart reasoning. With waylay, OEMs, integrators and solution providers move beyond data aggregation and visualization and create intelligent applications that save time, money, improve customer service or enable new business models.
