## Description

Cybersoft Information Technology Ltd.Co. was founded in 1995. As an ISV it is one of the biggest software shops in Turkey with over 400 software engineers (almost all of them computer science, industry and electronic engineers). We have completed many successful projects in the public sector and the finance sector. We have received many awards both domestically and abroad, the most notable one being the ComputerWorld Honors 2003 in the "Government and Non-Profit Organizations" category, with the Internet Tax Office site (and the whole tax system) we built for the Turkish Ministry of Finance.

We have extensive work experience in Azerbaijan and have worked with Toyota in Belgium. On the non-commercial side, we have worked with international partners in EU's Sixth Framework Programme and the CELTIC Programme.
