Description
Tactel - Humanizing Technology

Today's consumers interact with business services throughout multiple touch points. We believe it's vital to look at them as foremost humans, not users, to understand how those services play a role in their lives.

Tactel is a Human-Centered Innovation and Technology company that can help you create value by bringing you closer to your customers. Find out more at www.tactel.se. We are 80 people with offices in Stockholm and Malmö - Sweden.
