CTO, founder
Evothings

Bilateral Meetings

- 03.03.2015 Tuesday (11.05h - 13.10h)
- 03.03.2015 Tuesday (13.10h - 15.15h)
- 04.03.2015 Wednesday (11.05h - 13.10h)
- 04.03.2015 Wednesday (13.10h - 15.15h)

Description
Evothings is an open source tools company, founded in Stockholm 2013 with the laser focus on making it easy for developers, tinkerers and makers to create mobile apps for connecting phones and tablets with other things.
With Evothings Studio, developers use HTML and JavaScript to make publishable Android and iOS apps where phones control and monitor things like microcontrollers, home automation, wearable sensors, industrial hardware dev kits et cetera.

IoT, Internet of Things, development, web technologies, sensors, microcontrollers, messaging, security, encryption, m2m

European Institute of Innovation and Technology awarded Evothings 2:nd place the finals of EIT ICT Labs Ideas Challenge 2014, contact us at the EIT stand at MWC.
