- 04.03.2015 Wednesday (11.05h - 13.10h)
- 04.03.2015 Wednesday (13.10h - 15.15h)

Description

TokBox develops and operates OpenTok, a global service that enables you to add live face-to-face video experiences to any web or mobile property. We believe that integrating live video into products should be simple, whether you're developing an app for one-to-one calls or for complex large-scale broadcasts. OpenTok is a flexible platform that leverages cutting-edge video, audio, and networking technologies such as WebRTC to bring the best possible experience to your browser or device through simple APIs. In 2012, TokBox was acquired by Telefónica Digital, a division of Telefónica S.A. @tefdigital is the global digital technology and innovation arm of Telefónica, the leading global integrated communications operator. TokBox is a Silicon Valley based company with offices in San Francisco, Sydney, London, New York and Barcelona. All about TokBox, including a free (and premium) immediate access to our product, is available at: <http://www.tokbox.com/>
