Description

Skylane Optics is a leading provider of transceivers for optical communication. We offer an extensive portfolio for the enterprise, access, and metropolitan fiber optical market as well as for home networks based on plastic optical fiber. Skylane Optics is based in Belgium where the logistics center and the high tech laboratory are located. We are covering the European market with a strong partner network and have offices in Brazil, Taiwan, Sweden, Luxembourg and Italy to support partners and customers locally. The offerings provided by Skylane Optics are characterized by high quality and performance. In combination with our strong technical support, we enable our customers to build cost optimized network solutions solving existing and future capacity needs.

Organization Size

26-50

Areas of Activities

HARDWARE

1. Backhaul solutions
2. Core network equipment
3. In-building systems
4. IP networking equipment

Offer

Optical transceiver for fronthaul mobile network

Take full advantage of your high quality fronthaul mobile network with Skylane Optics modules - double the fronthaul network capacity without changing the passive infrastructure, thanks to the single-fibre single-wavelength CWDM transceiver designed for CPRI protocols.
