- 04.03.2015 Wednesday (11.05h - 13.10h)
- 04.03.2015 Wednesday (13.10h - 15.15h)

Description

Escaux is an extremely innovative and disruptive provider of Cloud Communication technology for Fixed, Mobile and OTT networks. It's unique and break-through Unified Endpoint technology combines any communication device (mobile phone, home phone, office phone, soft phone, WebRTC and VoLTE client) into a single "Virtual Personal Communication Device" called a Cloud Phone. The Cloud Phone connects seamlessly to a corporate PBX, an OTT network or an IMS network, offering its owner the possibility to communicate using his communication identity of choice (landline number, mobile number, office number, OTT number) regardless of the communication device or client being used

Organization Type

Company

Organization Size

26-50

Areas of Activities

SOFTWARE/INTERNET

1. Application development
2. Messaging
3. Mobile social networking
4. VOIP Systems
