Description
12Rockets is a design centric mobile development studio focused on tailor-making mobile apps. We specialize in creating platform native, backend powered applications for both Android and iOS. At 12Rockets, we combine the experience of years spent working on complex software projects with a passion for crafting high quality and impactful mobile applications. Our team is a carefully curated collective of designers and mobile developers, all of whom share the same dedication to crafting outstanding mobile experiences.

Offer

Mobile app design and development

We offer:

- PLANNING & IDEATION
You know your business, we know mobile. We work closely with you to get an in-depth understanding of what you need

so that we can answer the fundamental questions: what should we build and how

- PROTOTYPING

We take great pride in our ability to get your prototype up and running quickly allowing you to test against potential pitfalls and to learn from the experience.

- PRODUCT DESIGN

UI, UX, Animations, Interactions and Brand - we care deeply about the whole package. Our designs are platform native, data validated and user tested.

- NATIVE DEVELOPMENT

Be it iOS or Android, we firmly believe that the best mobile experiences are driven by native apps, built with the DNA of the device they live on.

- CLOUD & BACKEND

Backend powered, complex mobile products are our specialty. We excel in backend development, be it made from scratch or based on the cloud platform of choice.

- LAUNCH & UPKEEP

We don't leave you hanging once the app is deployed to the app stores, but stick with you through updates and new developments.
