Description

vidFlow, the world's first music video service with licenses from Universal, Sony and Warner Music, tailors videos to your preferences - making music video consumption and discovery easier than ever, all while contributing directly to the artists, making the video a product of monetization - not just marketing.

Request

Premium music video service with content from all major record labels fundraising for global expansion

vidFlow is currently raising USD 5m intended for the investment in technical and organizational preparations for international expansion, including completing the establishment of its global office in Los Angeles, recruiting of key executives and locking in distributional partnerships in all relevant territories.

Cooperation Requested

1. Investment/Financing

Request

Premium music video service with content from all major record labels looking for telco/cable partner

In regards to its international expansion, vidFlow is looking for partners interested in a top tier cross-platform service that can help your business become the center of home and mobile entertainment. Whether through bundling or profit share models, vidFlow can be a value-adding service that helps reduce churn.
