Description

Xplica't is a technological company that develops mobile applications tailored for iOS and Android systems, specializing in augmented reality as a tool to combine the real world with computer generated content.

At MWC2015 Xplica't presents 'elector', the first mobile app aimed at political parties, organizations and institutions who wish to bring election campaigns to the citizens.

The first election campaign app to be developed in Europe!

And also presents 'elector Business' an opportunity for all businesses to get their own mobile app in real time and at a very competitive price. Why your business do not have a mobile app?
