Bilateral Meetings

- 02.03.2015 Monday (15.10h - 18.05h)
- 03.03.2015 Tuesday (11.05h - 13.10h)
- 03.03.2015 Tuesday (15.15h - 16.55h)

Description

Apmato is an online mobile app creation and content managment system.

TouchingCode GmbH, a Berlin, Germany based software developer, is the company that created the apmato system. With apmato, everybody with an idea and a will for a mobile app can easily build native, *mobile apps for iOS, Android* and other mobile operating systems to come. Sample apps include event apps, conference guide apps, travel guides, company profile apps, restaurant and hotel apps. See http://www.apmato.com for more details.

We are looking for financial partners, beta testers and integration partners e.g. from the web-development area.

We offer more than 5 years of expierience in creating apps for iOS, Android as well as developing backend servers and rich HTML5 dynamic web applications.

TECHNOLOGY

- CORA: Content Rich Application system, unique multiplatform app creation with fully automated build process for iOS and Android

- CMS like system: design, programming and content are seperated. Apps are defined by placing functional modules inside of layouts. Modules are programmed either native (Objective-C, JAVA) or in HTML/Javascript

- Visual App Editor: the app and the content of the app can be edited and new content published

- open system: New modules can be added by the user, Open Source
