Ecebs is a technology company specialising in solutions and services within transport, payment and local government sectors

Organization Type
Company
Organization Size
26-50
Areas of Activities

HARDWARE

1. SIM cards and Smart cards

SOFTWARE/INTERNET

1. Application development

Offer

Smart ticketing transport software products for Rail, bus, metro or ferry

Ecebs is a technology company based in Scotland, specialising in solutions and services within transport, payment and

local government sectors. Our experience in transport, particularly related to the UK's open standard, known as ITSO is both extensive and unmatched. We supply the building blocks of the ITSO ecosystem including the ITSO security management service (known as the ISMS) and ISAMs (ITSO Secure Application Modules).

Our Paragon range of transport products are deployed in the largest ITSO ticketing schemes in the UK and we have deployed a number of NFC based ticketing apps to enable customers and partners to retail and deliver smart tickets.

Paragon provides smart ticket retailing and delivery as well as providing back office data collection of ticket retail and usage information. It also provides high level security for all data. An element of Paragon delivers tickets instantly with an "in the cloud" service. This enables ticket delivery and pick up anytime, anywhere.

We are interested in speaking to ticket retailers, system integrators, service providers, kiosk and ticket vending providers.
